achievements.

- Recipient of the Gold Medal for Outstanding Innovation at IIT Gandhinagar.
- Recipient of the Director Fellowship Award at FIEA.
- Ranked #22, out of 10k+ participants, Brackeys Game Jam 2021.1.
- Ranked #1, Jamboost Game Jam out of 300+ participants, won \$1000.
- Received Silver Medal at Inter IIT Tech Meet for IGDC Gamedev Challenge
- Developed games downloaded over 447K+ and played 2M+ times.
- 1 of 100 students selected for Chennai Mathematical Institute in 2019.
- Ranked #2 Nationally, Indian Commerce Olympiad (Maths, Aptitude).
- Top 0.4 percentile in JEE Mains & 0.3 percentile in JEE Advanced.

Aniket Rajnish

education.

2019 - 23 | IIT GANDHINAGAR | Mechanical Engineering, Design Minor | 8.41/10

+1-(321)-310-8828

aniket.r@iitgn.ac.in **Portfolio Website**

2023 - 24 | FIEA, University of Central Florida | Technical Art Major | Ongoing

work experience.

Studio Head Contractor, CrazyLabs

(Aug 2021 - Mar 2022) Partnered as a game studio, and led a team of 4, resulting in development of

prototypes, 30 concept pitches & 1 market-ready Hyper Casual game.

Technical Art & Design Intern, FIEA (May 2022 - July 2022)

 Provided assistance in shader & gameplay programming, and the development of particle & VFX systems. Curated development logs and documentation about my contribution that can be found here.

Secretary, Game Dev Club, IIT Gandhinagar (Aug 2020 - Apr 2021)

- Guided 100+ game developers about Unity & basics of game development establishing connection with Kwalee, Homa Games & Crazyblabs.
- Successfully organized GameJam 2020 AD, the third largest Indian game jam on itch.io at the time, with 600+ people submitting 90+ games.

projects.

Collider Optimizer for Unity [300+ stars on Github] [80.lv Article]

- Developed a tool that optimizes Mesh and Polygon Colliders in Unity.
- A C# implementation of the Ramer Douglas Peucker Algorithm is used to smooth polylines and reduce number of paths created by Polygon Colliders.
- A C# implementation of the Quadric Error Metric simplification is used on the shared mesh of the Mesh Collider to reduce its poly count.

Text to Material for Unity

- Developed a plugin for Unity that generates materials from text prompts in Unity.
- Sets material properties, generates base & normal maps using OpenAl API calls.
- Implemented algorithm to parse material properties from natural language input.
- Developed an Editor Window for Unity to take prompts and settings from user.

Multi-Window Synchronization for Windows GUI

 Developed a windows GUI application using PyQt5 and qtSignal that demonstrates real-time synchronization between multiple window instances.

C# Implementation of a 4D Raymarching Engine

- Developed a raymarcher that helps render 4D objects and take control of their 4D & 3D transformations. It also supports lighting, AO and shadow information.
- Implemented compute-buffers, raymarching signed-distance functions, built a custom interface for manipulating shader parameters through the editor.

Spiderverse-inspired Post Processing

- Developed Spiderverse-inspired post-processing for Unreal Engine and Unity.
- In Unreal Engine it's done using a custom post processing material that takes specular and shadow information from the scene as texture maps and overlays them with benday dots and hatching lines respectively.
- In Unity we write a custom renderer feature for URP, reverse engineer the default bloom image effect shader using shader graph, replacing it with benday dots.

3D Shapes Dataset Generator

- Developed a GPU-accelerated tool that helps create procedurally generated raymarched 3D shape datasets consisting of 17 primitives & 3 operations.
- Users can precisely control the orientation and position of each shape, as well as the overall quality and size of each dataset.

Two Opposites (Ranked #22 internationally, Brackeys Game Jam)

- Formulated and developed a <u>2D Lighting System</u> in C# for Unity using raycasts and Unity started official support for it in a later update.
- Programmed every mechanic of the game which included, but not limited to mirror movement, multiple camera setup, etc.
